# Photos

Welcome to photos, the place to create Photo galleries.

These galleries make it easy to add collections of photos to a webpage.
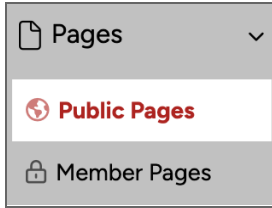

To learn more about setting up your website, check out our Webpage Settings and Webpage Template videos and documents.

Start a new Gallery, and add a Title and Description.

Upload your images and, if you would like, set a Publish date for these photos to be displayed on a webpage. Once pictures are saved to a Gallery you can add Titles and Descriptions.
